

About Me:

I am a Computer Science student at Southeastern University with a strong interest in data science, video game development, and cybersecurity. I've completed both the Google Cybersecurity and IBM Data Science certificates, and I enjoy applying my skills in Python, SQL, and C# to real-world problems. Alongside my coursework, I've built game engines and developed 2D and 3D games using Unity, which has strengthened my problem-solving and programming abilities. I'm currently seeking an opportunity to grow as a data scientist and contribute to meaningful, data-driven projects.
